User name was given on 353 responses (but not verified)

Note about continent evaluation:

Africa is missing from the list because there were only three responses identified as coming from Africa, and their inclusion would risk de-anonymizing the person(s) who have responded.

Note about user group evaluation:

The column "paid" contains all replies from people who identified as affiliated with an organisation that does paid mapping.

The column "org. and not paid" contains all replies from people who identified as affiliated with an organisation that does other organised mapping but who were not counted in the "paid" column.

The column "neither" counts replies from people who identified as neither affiliated with organisations that do paid, nor organisations that do other organised mapping.

The column "interacted" counts replies from people who have interacted with paid or organised mappers but who are not affiliated with either.

The column "not interacted" counts replies from people who have not interacted with paid or organised mappers and who are not affiliated with either.
